

CLAREMONT CIVIC ASSOCIATION

DISCLOSURE

This notice is to disclose that Claremont Civic Association is currently engaged in the review and assessment of the current golf course irrigation system installed almost thirty (30) years ago.

The Claremont Board of Directors is undertaking this comprehensive review to determine a reasonable and financially viable solution, to identify a replacement system that has the updated technology applications that are efficient and effective, meet golf course construction standards, and a system that insures long term durability. Claremont has retained a local irrigation design and consulting company to start the process as described above.

Financial requirements, funding models, and timelines are yet to be determined.
